

## REPUBLIC CREOSOTING COMPANY

TO: HOME OFFICE - Indpls.

St. Louis Park, Minn.

FROM: Mr. R. L. Rademacher

May 10, 1933

SUBJECT: VILLAGE OF ST. LOUIS PARK WATER SUPPLY

US EPA RECORDS CENTER REGION 5

514873

Referring to Mr. Reilly's letter of May 8th, we wish to advise that we are unable to find your letter of April 8th<sup>7th</sup> but is clear from his May 8th letter as to what he wants.

We are, therefore, sending you a one-gallon sample today of water taken from our well and you will be interested in knowing that we have been pumping water for several days so that this sample should be representative of the source from which we are drawing.

This well has now been cased at the 65 foot level and the casing is continuous now to a depth of 373 feet at which point the casing ends.

The sample which we sent you today has been carefully taken but as you know it will not be suitable for a bacteriological examination because of the time and temperature conditions between the time of sampling and its arrival at Indianapolis. If you wish to have this done, please advise and we will arrange to have this done in Minneapolis.

Yours very truly,

REPUBLIC CREOSOTING COMPANY.
